I saw someone mention F11. Is there a document somewhere that describes the shortcut keys?

Well, not much to say, it just increase the browser window to cover the entire Workbench screen, just press F11 and you will see for yourself, this functionality work exact the same on all the other version of Firefox/other OS

Here a quick list of the available shortcuts

[http://support.mozilla.org/en-US/kb/k ... orm-firefox-tasks-quickly](http://support.mozilla.org/en-US/kb/k...orm-firefox-tasks-quickly)

Is there some documentation for the GUI? What do all the toolbars do?

Again check: <http://support.mozilla.org/en-US/home>

Here you can find all info you need for Timberwolf/Firefox

Should I be able to change the font size? The default font used throughout the GUI (labels, titles, etc, not displayed text) is much too big and ignores the system Font settings.

Sadly no, but there is a ticket already open on the bugtracker so let's hope to see it implemented as soon as possible 😞
