Bookmark import:

I tried importing bookmarks, naturally, and for me it works (exported from my Window installation). TW does not support OWB's format, so there is nothing I can do. Sorry, not going to happen

I wasn't asking or expecting that you would import OWB-format bookmarks. I am quite prepared to edit the file myself (it's only an ASCII list), but I don't know what the required HTML format is and RC1 does not (here, anyway) save any bookmarks of its own, that I could Export.

Perhaps someone with working bookmarks could export an HTML file and post part of it so that I could copy the format. Just the header, trailer and one or two items from the middle would be enough.
