@Frieden bros

Thank you very much...this version is awesome 😊

I commented on my two bugs

It s far more stable here now (giving some headaches on add-on installing though, but they are gone on restart) running now as my main browser.

Thanks again, awesome work

Regarding add-on installing:

One thing that doesnt work is the "automated restart after addon has been installed"...well, it DOES work, but it quits and restarts so fast that the first incarnation of TW does not has the chance to free itself up completely, which leads to crashy behaviour and of course a lot of RAM eating.
