I only got around to trying it recently, but I can't get it to work on my X1000. PlayCD seems to completely ignore me pressing it's Play button. Quitting the patch allows it to work again.

This is a shame, as I was hoping I could replace my aging IDE CD drive (with SATA adapter) with a modern SATA one.

Were you trying with diskimage.device? If so there was a bug in READ TOC in newer versions when the TIME bit was set in the command (like with SYS:Utilities/PlayCD f.e.). This bug is fixed in the 52.78 version that I just uploaded. AFAIK only the device itself has changed so if you have 52.77 installed from before you only need to update the diskimage.device file in DEVS: and then reboot.
