And what about printing? It's there a direct turboprint support?

Doesn't AmiPDF already do this? When I open the Print window, my 2nd through 4th entries are different TurboPrint methods.

It's possible to export pages as bitmap images?

I think that a feature list is highly needed, or at least a link to a page with detailed description.

AmiPDF also does this already. Again, in the print window you can "print" all or parts of a PDF file to postscript, EPS, various JPEG and various PNG formats.

Thanks,

PJS
