I guess what Kas1e is trying to say is that he is offering to port VPDF right *now* (while keeping the MUI interface). The question is who (if anyone) is offering to port VPDF & rewrite it's interface using ReAction, or get hold of AmiPDF source & update it's core. You? If not, then Kas1e is the only one offering their time & effort right now, so why not take advantage of it?
