The question is who (if anyone) is offering to port VPDF & rewrite it's interface using ReAction, or get hold of AmiPDF source & update it's core. You?

I've worked with kas1e before, so why not? If he gets VPDF to compile under OS4 with GCC, I'll gladly take a look at the source code and see what I can do. If it turns out to be too much work, the MUI version will always be there.
