Checked my installation, same versions, reinstalling the original Update 6 reappeared the old updates, but when I update something old files are not saved, so there are no news Rollbacks, the last one it's still from 5 january 2013 and it's Rollback itself, are there something else that I can check?

let snoopy run during an amiupdate installation and check what happens when copystore is called. maybe the destination path is somewhat changed?

regards...
