Hi,

I have installed the newest update (dos library) and no rollback in the list.

I had this issue before (written in the thread), since the last AMiUpdate Update (around 8. january).

Last try was to install AmiUpdate from amiupdate.net and wait for a new update, today a new update arrived (works fine, thanks) but no rollback...

So why the rollback was available before the 8th of january?

(last week I cleared the list, before the clic2front update, because I thought that new updates will come into the list).

I have all standard installation, only update with amiUpdate (just last week the reinstall of amiupdate from the webpage).
