@Severin

I know, but it doesn't work. I have set it to 107 characters, and I have set it to ask about every kind of deletion but it ignores the settings. Just wondering if this is a OS4 port issue or something.

Maybe the settings shows one set of settings but DOpus actually uses a different set from some other location. Seems strange though since many other settings seem to work like screen mode, lister placement, fonts etc.

@kas1e

Do you have a simple/complete setup that works on OS4 or do I need cross-compiler? I just cannot be bothered sitting on that PC and code. That's just not happening.
