i will do more with Magellan this weekend (68k version on AROS 68k). So far it works great (except icons). The functions are really astonishing and the speed. Let alone the "file format sniffer" 😊. I am total excited and the native versions will become a new standard for Desktop on amiga-platforms, in any case certainly on all AROS distributions. My next version of AROS Vision will already be based on Magellan. Thanx to everyone and especially to itix and kas1e.
