MUIOWB : AmigaBounty still alive ?

Hello all,

Just want to know if the concept of AmigaBounty is still alive ?

It seems that Kas1e (and certainly others) is ready to work on an update of MUIOWB but no bounty is open.

As many peoples complains about the lack of MUIOWB update, I think that many peoples are waiting for this update and will be happy to financially contribute to an eventual bounty.

Therefore, is there a reason why it's not possible to ask for a bounty ?

Hoping that Troels could open a Bounty for MUIOWB...

Thank for your reply

Guillaume
