Youpi, what a wonderful week for amateur devs ;)

A new SDK and a new IDE to discover...

Thank you Rigo for this big update !!!

Is somebody know how to recover his old settings from previous release of CodeBench ?

For example, before, at least for me,

for line like

```
#include <stdio.h>
```

#include was in red

<stdio.h> was in pink.

Now all is in black. I don't see where it's (was) specified in the settings.
