Mplayer Altivec test version for G4 and PA6T-1682M

Author: : LiveForIt

Date: : 2014/4/4 0:06:50

URL:

This is my first official beta version of Mplayer.

No overlay is supported.

No ARexx support. (disabled It crashed and was not important to what I was working on)

Video out:

* wpa_cgx,

* SDL.

* gl/gl2/matrixview

Its also compiled whit lots of other outputs, like gl/gl2/matrixview I have not tested this mode, do not know if they work or not, try the modes out if you have MiniGL.

Audio Out:

* ahi_dev,

* sdl,

* mpegpes (don't know what that is)
