**SMTube 14.8 svn 6558** on OS4Depot

**When a video was not found, only on AmigaOS4, you could encounter a CPU loop** and/or a non display of the error window.

**Now, it's fixed**, by replacing the original Qt MessageBox by a standard Qt Window.

Thanks to Ricardo to have merged the AmigaOS modifications in his repository and to Kicko and Samo79 for the bug report.
