Thanks all, objective achieved, yes I went the POST route, updated my PHP script to \$_POST instead of \$_GET, plus the Hollywood code below, if its any use to anyone else, go ahead and modify.

```
OpenConnection(1, "example.com", 80)
```

```
Local trans = SendData(1, "POST http://www.example.com/script.php HTTP/1.0\nContent-Type: application/x-www-form-urlencoded\nContent-Length: " .. 6 + 10 + StrLen(var1$) + StrLen(var2$) .. "\n\nvar1=" .. var1$ .. "&var2=" .. var2$)
```

```
Local gotline$, count, done
```

```
/* SKIP HTTP HEADER */
```

```
gotline$, count, done = ReceiveData(1, #RECEIVELINE)
```

```
While gotline$ <> "Content-Type: text/html"
```

```
gotline$, count, done = ReceiveData(1, #RECEIVELINE)
```

```
Wend
```

```
gotline$, count, done = ReceiveData(1, #RECEIVELINE)
```

```
gotline$, count, done = ReceiveData(1, #RECEIVELINE)
```

```
/* SKIP HTTP HEADER */
```

```
gotline$, count, done = ReceiveData(1, #RECEIVELINE)
```

```
While gotline$ <> ""
```

```
/* loop through lines */
```

```
gotline$, count, done = ReceiveData(1, #RECEIVELINE)
```

```
Wend
```

```
CloseConnection(1)
```
