The new version of [FastATA 1200](#) will shortly be shipping from AmigaKit.com.

FastATA 1200 is the most advanced IDE interface for the Amiga 1200 computer, providing up to PIO-5 performance and LBA 48-bit compatibility.

Continuing AmigaKit's commitment to sponsoring development of Classic Amiga hardware, Elbox have manufactured a new production run of this popular IDE interface.

FastATA MK-IV is natively supported in the new AmigaOS 4.1 Classic. It is also compatible with the older AmigaOS 3.0, 3.1, 3.5 and 3.9.

Includes the latest AllegroCDFS v3.6 and ATA3 v10 driver software.
