Unfortunately that doesn't help me to build SDL2 with dynapi support. I found some of my older SDK has dlfcn.h by Hyperion, I wonder was it dropped from the latest SDKs or did I lose it myself.

Regarding dynapi, here is some good info <https://plus.google.com/+RyanGordon/posts/TB8UfnDYu4U>

Of course we can implement a symbol loader by Elf.library, or just disable dynapi, but this looks like a possibility in a world full of statically-linking developers ;)
