Yes, this thread has been inactive for a year, but I bring very happy news: The Yamaha P45B Digital Piano is fully compatible. :)

Now that camd.library and camdmidi is distributed with the OS, there is NOTHING you need to prepare. Just plug this fine digital piano into your USB port and it appears as "Digital Piano.in.0" and "Digital Piano.out.0" I am told the slightly higher end P115 is also fully compliant.

Now off to tickle those ivories. :)
