URL:

I can't find it on the SFS page anymore:

<http://strohmayr.org/sfs/>

I'm going to need a filesystem capable of handling files >4GB if I'm to test the mounting of DVD images with diskimage.device (I have just implemented NSD64/TD64 support but have yet to test it).

Also any suggestions on DVD mountlists for me to try/use would be appreciated too.
