Browsing to this site makes part of the text display mirrored.

I (seldomly) stumble over such sites, why is that?

Is Odyssey interpreting css/html code wrong?

I'd say its a feature of the website. Try clicking on either of the cards, and it will flip to display the text correctly.

Glancing at the HTML code, there's indications that this flip-thing is disabled in certain browsers (probably those that doesn't support the attribute "flip").
