@kas1e

I just talked to a MorphOS User about my router problem and (as he has nearly the same setup as me) he is still unable to access his router (with the same firmware) but he's using Odyssey 1.24//MorphOS.

He also tried it with Sputnik and gets the same error message.

So, would it be possible to update our port to 1.24, please?

I'd really like to be able to access my router again.

Thank you
