I just talked to a MorphOS User about my router problem and (as he has nearly the same setup as me) he is still able to access his router (with the same firmware) but he's using Odyssey 1.24//MorphOS.

He also tried it with Sputnik and gets the same error message.

You may ask him to try 1.23 morphos version.

If it will not works on 1.23, but work on 1.24 => webkit problem. If it will works on 1.23 on mos, then or porting-to-aos4-problem, or something with settings.

Quote:

So, would it be possible to update our port to 1.24, please?

I didn't see sources of 1.24 online, but newer ones (which on github), and which, have welknown js-endian problems.
