Yep, and a lot of the builds are deleted because this has gone on a bit long before I found out there was a problem 😞 But I'd like it narrowed down as much as possible as 500 builds is most likely over 1000 commits to look through, and I don't really know what I'm looking for.

Probably worth re-iterating: if a bug is introduced, please tell me ASAP, as it's a lot easier to find and fix regressions when they've only just happened. Especially with something like this when it isn't a simple crash.
