Check plz, if you have in your SYS:MUI/Images/default_OS4/ Listtree1.mi1 and Listtree2.mi1 ? Did they looks like images ?

I seems to find a way, how to reproduce your missing "n" character, and that indeed happens only when mui can't by some reassons load Listtree1.mi1 and Listtree2.mi1. Then, in some states because of missing images, it seems overwrite some buffer, and then "n" missing.

Through strange , why those 2 images didn't loads for you by default ?
