New update of SMTube on OS4DEpot and AmiUpdate

17/12/11 : port of the latest 17.1.0 svn8442

\* Fix VEVO videos

\* [AmigaOS 4] Added latest "Download" 1.4 download program from Tuomas Hokka

\* [AmigaOS 4] Added ""%u"" for new Emotion video player (""%u"" works too with MPlayer) (ONLY for new installations otherwise you will have to change it manuall, see below)

\* [AmigaOS 4] How to configure Emotion ?

1) open ENVARC:SMTube.ini to comment MPlayer and add Emotion

```
<MPLAYER_OPTIONS>
```

```
<MPLAYER>APPDIR:EmotionDemo
```

```
**<MPLAYER_OPTIONS>-vo comp -ao sdl -cache 8192 -cache-min 20
```

```
**<MPLAYER>APPDIR:MPlayer-altivec
```

2) Open SMTube / Settings menu

-Players tab

-Edit "PlayVideo.rexx"

-check that stream ""%u"" is specified (double-quotes around %u)

These ""%u"" works too if MPlayer is used

Certainly that you will encounter these problems if you use FE update 1 :

Proc: problem come from new FE Update 1 SObjs libpng and new libfontconfig.

"solution", revert to previous libfontconfig and install libxml2

<http://www.os4depot.net/share/library/xml/libxml2.lha>

see infos here :
