Since I don't see the Amiga changes merged back into the main repository

Please at least make an effort to get your changes merged upstream. Open source maintainers are usually happy to merge changes for obscure machines and often comment that they used to own an Amiga. 😞

There are far too many applications ported to the Amiga where the changes have to be applied again, every time there's a new version, just because the changes have not been merged back (and most likely have not even been attempted to be merged back).
