@kas1e

1. Do you mean in the listbrowser or down below? If listbrowser, it will always be there. If down below you can toggle it off/on from menu or gadget View->Thumbnail.

2. Would love to, but listbrowser.gadget can't do single cell selection (like MUI can).

3. Window menu -> Open Workbench window

@broadblues

- Fixed Type sorting issue.

- Thank you! Support your independent programmer through donations to them.

@nubechecorre

- I would love to patch WB to open WEx when double click on a device/drawer. As is, not possible.

@xenic

- Never heard of anyone testing the way you do. I will see if I can do a retry count as you mentioned.

- I use my own images drawer because mason made me several new images that aren't in the public release yet (might be, not sure). So if they weren't current, no images.

@Tuxedo

- Could you email me some images, say 5, that have Exif thumbs? I will see what I can do.

@All

Keep checking the menu: Project->Check latest version

for updates. I will post them regularly. Check the Change Log for details.
