URL:

Exchanger 1.2 (4.4.2016)

First:

Exchanger doesn't have an "About" tab in it's info window, i miss that because one can easily copy the programs information for bug reporting.

Second:

I can make Exchanger fall over

Steps to reproduce:

- 1) Open Sys:Utilities/Commodities
- 2) Start Exchanger -> all is fine
- 3) Start ScreenBlankerEngine from the same directory -> still fine
- 4) Double Click on ScreenBlankerEngine once more
(it does matter if the ScreenBlankerEngine was in the list before, because it will fall over as soon as ScreenBlankerEngine gets *removed* from Exchanger's list)

From now on Exchanger will show in it's info part "No programs in list." for every program in the list -> Bug

As long as one doesn't close Exchanger (from it's menu, that is, it's NOT enough to simply close it's window, but to completely kill Exchanger with Project/Quit) and start it again it will stay this way.

It may also happen with other programs, i didn't bother to test.
