Well you need a RTL 8169 PCI card (the best) or a RTL 8139 PCI card. They will both work with an X5000 out of the box. The RTL 8169 card does 10/100/1000 speed and the other one does 10/100

I am adding a PCIe (8169) card to our store (Amiga On The Lake) with worldwide shipping over the weekend but you can most likely get the 2 I recommended cheaper with less shipping cost in your area.
