It sounds like it should be in libz.so

But none of the libz.so I have, have that symbol in them, not the latest beta, nor the Final Edition version or any other I can find

```
8.AmigaOS4:SOBjs> readelf -s libpng16.so | grep inflateReset
```

```
20: 00000000  0 FUNC  GLOBAL DEFAULT  UND inflateReset2@ZLIB_1.2.3.4 (3)
```

```
169: 00000000  0 FUNC  GLOBAL DEFAULT  UND inflateReset
```

```
331: 00000000  0 FUNC  GLOBAL DEFAULT  UND inflateReset2@@@ZLIB_1.2.3
```

```
480: 00000000  0 FUNC  GLOBAL DEFAULT  UND inflateReset
```

```
1.AmigaOS4:> readelf -s FE:SOBjs/libz.so | grep inflateReset
```

```

```
