Hopefully the Crystal Pine card I ordered will do the trick.

What chip does the "Crystal Pine" card have? Is it one of the supported chips? If not, you could be disappointed.

There are audio drivers for these sound chips:

CMI8738

CS4281

EMU10KX

ENVY24

ENVY24HT

FM801

SB128

SOLO_ONE

Make sure that what you are buying has one of these chips before you spend money on it.

There are many variations of SB cards, some made specifically for Dell and incompatible with everything else.
