For ease of reference, in case you're one of those readers who, like me, tend to just hop to the end of a long topic chain to see where everything has landed:

The first/originating post in this topic chain has now been extensively updated again. Most of the typos/errors/clarifications should be in there.

I also have 2 follow-on guides to this one.

1st: A guide showing how to actually use the Cygwin version of these adtools inside Visual Studio 2017

[http://www.amigans.net/modules/xforum ... m=25&topic\\_id=7639&order=](http://www.amigans.net/modules/xforum ... m=25&topic_id=7639&order=)

2nd: A guide showing how to actually use either the Cygwin or UWin versions of these adtools from your Cygwin or UWin bash command-lines instead of using an IDE.

[http://www.amigans.net/modules/xforum ... m=25&topic\\_id=7654&order=](http://www.amigans.net/modules/xforum ... m=25&topic_id=7654&order=)
