I'm entirely unfamiliar with SDL.

If anyone can inform me what they're trying to compile/build, the sources for same (I just downloaded a couple of .lha's, one called SDL2\_SDK\_r177.lha and another SDL2\_user\_r177.lha. Not sure if that's even what I'm looking for.

I don't even know what a "hello, world" looks like with this library/toolkit. If someone can provide that, too, so I can confirm things are working that'd be hugely helpful.

Basically, I don't know anything about it, so I just need a starting point to see if I can get things to compile/build/Hello World. If I can, I'll report back on what I find.
