hi, can I also post some hardware which is not working?

IMHO a list of "USB devices that do NOT work with OS4.1 FE" could be handy too.

And am I still in time to wish everyone here a Happy new year?! 😊

Edit: I should have read the entire first post.. anyway

Partially working:

- Zalman ZM-M520W(L) in "Early boot Menu" the mouse pointer only moves _vertically_. After OS4.1FE is completely booted it works fine.
- Cherry XERO Corded MC-3000 in "Early boot Menu" the mouse pointer only moves _horizontally_. After OS4.1FE is completely booted it works fine.
- StarTech SV431DVIUDDM AmigaONE X1000 hangs at UBoot if the KVM is connected to the "Keyboard" USB-port. ONLY AFFECTS X1000!
- ATEN CS682 AmigaONE X1000 sporadically hangs at UBoot if the KVM is connected to the "Keyboard" USB-port. ONLY AFFECTS X1000!
- Belkin SOHO KVM switch AmigaONE X1000 hangs at UBoot if the KVM is connected to the "Keyboard" USB-port. ONLY AFFECTS X1000!

Working

- ATEN CS22U KVM switch. No issues found
- Wintech SAC-50/DMI-55 USB SATA IDE converter
- SpeedLink Competition Pro Joystick USB
- Epson Stylus Color 760 Needs TurboPrint 7.60 (available for purchase January 2018 at www.zedonet.com. online shop for irseesoft.de). Parallel Port AmigaONE-XE with TurboPrint 7.10)
- Digisol 4.1 USB card reader

Edit 2: Tested with AmigaONE-XE, Sam440, AmigaONE-X1000 and AmigaONE-X5000
