URL:

Hi, pjs

I solved

I'm sorry, it took time and thanks for your patience

this is the script that works:

```
/* YouTube URL extractor */ Ver = "v1.5"
```

```
/* Default settings */
```

```
Embed = "0" /* Request content as an embedded video by default? 0/1 */
```

```
HTML = "0" /* Generate HTML page and open browser? 0/1 */
```

```
Login = "0" /* Login to your YouTube account? 0/1 */
```

```
Debug = "0" /* Write debug output to T: YT-Debug.log? 0/1 */
```

```
AutoPlay = "1" /* Automatically stream videos in mplayer / ffmpeg? 0/1 */
```

```
SkipDASH = "0" /* Skip processing of DASH links. 0/1 */
```

```
Captions = "1" /* Display list of captions? Console mode only. 0/1 */
```

```
CapLang = "" /* Caption language for autoplay. Blank for none. See docs. */
```

```
CapTrans = "" /* Translate captions to this language. See docs. */
```

```
Browser = "" /* Default browser: Odyssey / IBrowse / AWeb / NetSurf. */
```

```
ScanLimit = "10" /* Maximum amount of videos links to scan. */
```

```
UsePipe = "0" /* HTTPS Streams to MPlayer via STDOUT / STDIN */
```

```
TagOrder = "18" /* MP4 720p / 360p, FLV 240p */
```

```
PathMP = "APPDIR: Work: MickjT-Mplayer / mplayer-nonaltivec" /* Full path to MPlayer executable */
```

```
PathFP = "APPDIR: ffmpeg" /* Full path to FFmpeg executable */
```

```
ArgsMP = "- quiet -really-quiet -vo sdl" /* Optional parameters for mplayer */
```

```
ArgsFP = "- loglevel quiet -infbuf" /* Optional parameters for ffmpeg */
```

```
/* End of settings */
```

the wrong line was this:

```
ArgsMP = "- vo sdl" /* Optional parameters for mplayer */
```

the right one is this:

```
ArgsMP = "- quiet -really-quiet -vo sdl" /* Optional parameters for mplayer */
```

In odyssey:

Thanks again for your suggestions and your patience! 😊

And thanks to mickjT for this job really well done!
