<https://pastebin.com/Cnnrc26L> - for entire log.

graphics.library Altivec/VMX enabled
graphics.library PPC74xx optimizations enabled

RadeonHD.card (0): RadeonHD.chip 2.22 (25.3.2017)
RadeonHD (2): Graphics card name is: Radeon HD 7700 Series
RadeonHD (2): Identified the chipset as: VERDE

RadeonHD (2): If - and only if - your card does not work or does not work optimally
please submit a bug report at:

Amigadeveloper URL removed before posting here on Amigans

Remember to include the driver version, and the following card details:

0x683F:0x174B:0xE231: <name of board>

and *please* describe the problems you are seeing in detail.

RadeonHD.chip (0): ERROR: PCI BIOS ROM signature not found
RadeonHD.chip (0): ERROR: Could not obtain the AtomBIOS
RadeonHD.chip (0): RadeonHD card closed

Edit

I didn't notice that the debug buffer would not empty after a warm reboot
so I updated the link to a 'cleaner' log.

PCI BIOS ROM signature... as in legacy parallel PCI?
