@amig_os

I am pleased to confirm that the Polaris 2D and 3D drivers are completed. The 2D driver is called the RadeonRX and latest version is v1.10 (see here: <https://www.amisphere.com/updater>)

Warp3D Nova has now Polaris 3D support too through a new library called W3DN_GCN.library

We are just completing beta test and these will be available as a paid upgrade to end users soon.

@Petrol

Thanks! We are releasing regular updates to support our customers, so your positive feedback is most welcome.
