As an existing [Enhancer Software](#) user you will be able to download the p50x0_eth.device free of charge from [Updater](#) as soon as the Enhancer Software v1.4 is publically released. The complete v1.4 package is also a free update to existing users and is due imminently.

The new RadeonRX and RadeonHD v3.6 drivers are part of the forthcoming Enhancer Software v2 which is a paid upgrade. Very shortly I am going to let users buy an add-on package to the Enhancer Software containing three files:

- RadeonRX v1.10 (2D Polaris graphics driver with 64-bit VRAM support)
- RadeonHD v3.6 (2D graphics driver with 64-bit VRAM support)
- W3DN_GCN.library (3D Polaris library)

This add-on to the Enhancer Software will let users have full Polaris and 64-bit VRAM support now rather than wait for the v2 release. Once the add-on is purchased the components will become active on your AmiSphere account and Updater will permit you to download them.

@mufa

Thanks.
