By the way, why latest SDL 1.2.15 was never released to public ?

Latest public release is old (1.2.13 based) as it was released in 2012 ... it was stable enough for end users i think, but since then there were a lot of commits including the updating to the latest 1.2.15's code

Is there somethings we don't know about it ?

Any pending bug that prevent the public release ?
