Strange, I have missed the latest SDK release. I think I have 53.29.

Probably you have 53.24 (if i remember right it was 53.24, and then next one 53.30). But not so matter, all compiles fine now with latest branch update.

Quote:

Branch is updated again, let me know how it works.

Yeah! Now icon there and if i run it from home directory , and when run it from any other directory. Thanks !
Time for readme and release ?)

I also checked SDL2 iconification in that terms, it also didn't show icon when running not from home directory as sdl1 before, so probabaly that change need to be applied on sdl2 as well ?
