Reboot OS4.1 while recording test

<https://www.youtube.com/watch?v=pnSbKYhSgw8>

(Another OS4.1 Video record test))

one thing i thought was strange when i run that last one (original videofile) on my pc using mediaplayer classic, when that screenmode where changed to get settlers game fullscreen it behaved strange and sometimes crashed, i had to use another player (splash pro) to be able to play without stop. so, some hardware/software is doing its thing when screenmode is changed, or at least trying to.. just isn't perfect but it does work okay..
