Now don't works for me.

don't found RTP files, I have RTP 2000 and RTP 2003 files.

Where I put ?

I don't see any config file to expecific the path.

thanks

P.S. Well, I think some update corrupt my system, some games like flare, beret, rpgandroid, easy rpg, etc, freeze the miggy about 2 or 3 seconds of start the game. :(

How I can monitorize the start of the programs ?
