Yeah, it looks like most of the python gui's out there are Mac/Linux/Windows native or rely heavily on wxwidgets or QT. I think Kas1e did a QT port to OS4 so it may be worth taking a look at pyQT4.

<https://www.riverbankcomputing.com/software/pyqt/download>

I'd prefer something wxwidgets-based because it's more lightweight in terms of code and system requirements/resources but I don't think it's been ported to OS4.

Another lightweight GUI is FLTK and it has been ported to OS4. See this:

<http://www.soft3dev.net/pages/fltk.php>

and the pyFLTK page: <http://pyfltk.sourceforge.net/>
