@Capehill

Thank you, i learned something new today

There is an object file, but it hasn't been updated since August 2017, so it's not getting picked up at all while compiling, it seems.

Also:

```

There is a lot of DefaultAudioCDManager in there (that's the one from SDL2 iiuc), but only three instances of SdlAudioCDManager.

I don't know how it should look like if it's correct, but obviously the file is too old or even mixed with two SDL versions.

Unfortunately removing that object file, doesn't make it being created new

I also keep forgetting about "clean", thank you for reminding me, will try that next.
