We the developers would love to see it on the X1000 also.

Soon I'm going to an Amiga "Brisbane" meet up (next month). Hopefully show off the X5000 as I would really like to see more locals with Amiga NG machines :) Meanwhile, I plan to sneak in a few Amiga "Easter Eggs" within the game. It is tempting to add custom Easter Eggs to each Amiga pledger but as I can't promise an Amiga version, yet, I'll just add a few Amiga references inside the game :)

I'm hoping to also encourage the possibility of another Classic game (not out yet released, and looks awesome) to the NG platform.

As a low funded Kickstarter most of the funds will go elsewhere (Kickstarter, Nintendo license, physical copies, 3d print, posters) otherwise I would suggest to our team to put some towards whoever might be interested in a port. Could possibly be a second fundraiser for it though I suppose :)
