I think Raziell is experiencing the same bug that you reported: fullscreen toggle "breaks" the gadget.

If so then he just need to build latest version (you fix it all if i remember right)

Quote:

Yes I have an X5000 now. It is hopefully easier to sort out those remaining SDL2/ogles2 issues now :)

Yeah ! That will help surely !

ps. i write some more info in the bugreport you create on mantis about warp3dnova.
