Now you can. Just now I updated both versions mgl / mgldxt accordingly.

Yeah tested, problem gone 😊

Quote:

Phew, no idea. Sounds as if it could be anything, not even related to MGL. I suggest to file a bug and not to expect too much

Yep I've reported years ago and not only once, i've reported the issue to atleast two Quake 3 porters (first to Max Tretene and then to HunoPPC), then to the old MiniGL mantainers and even in Hyperion forum but no luck

...

At some point i give up

@Capehill

Indeed, i have exactly one of this system, Sam440 Flex 800 with Radeon 9250
