@Helloworld

Oops! That joke flew over my head. 😊

Quote:

Wow, from over 400 to under 300.

Did the UAE guys lost interests?

It's slightly over 300 now, but I'm also suspecting that the UAE guys lost interest.

I've tried out AmigaOS 4 on UAE, and it's nice to try, but nothing like the real thing. I really think that if the A1222/Tabor was already available then reaching 400 would have been easy.
