For Synergy I would suggest you look at UHCTools. One of the tools is 'SynergyClient" which was updated as recently as 6/18/2019. It runs on both OS3 and OS4. It works very well, in fact I'm writing this post using it now.

They do not offer the server, that is a bit more work. MorphOS ships with a built in Client and Server but for OS4 we have the UHCtools client.

Cheers,
Bill "tekmage" Borsari
